

## **Exciting opportunity for an Engineered Wood Products Designer/Estimator**

Shelter Products has been a leading lumber and building material distributor for over half a century. Our business is built on relationships, and our employees are critical to our success. As an employee-owned company, we are in touch with what is vital to our team. We offer a comprehensive benefits package designed to positively impact all areas of your life – from health, well-being, and career to financial security and personal safety. Please review the responsibilities and needed qualifications below and apply today!

### **Responsibilities**

This position will provide Engineered Wood Products (EWP) consultation, design, drafting, and quoting services for Commercial and Multi-family projects for customers nationwide. Daily responsibilities include preparing take-offs and placement plans for customers from construction documents using estimating and CAD systems.

### **Qualifications**

**Education:** Associate's Degree or equivalent combined with 3 to 5 years related industry experience and/or training.

**Experience:** Minimum of 5 years experience in the following:

- Floor and roof truss design process
- CAD software experience
- Plan reading and estimating, preferably with multi-family or commercial projects
- Structural load path development

### **Skills:**

- Ability to read, analyze, and interpret technical procedures and governmental regulations
- Ability to read and interpret architectural and structural blueprints
- Ability to calculate tributary loads, concentrated loads, and load transfer through a building
- Knowledge of current local codes associated with truss design (i.e., TPI, UBC)
- Solid knowledge of lumber and building materials
- Displays exceptional math skills, including but not limited to architectural units, fractions, geometry, and basic trigonometry
- Has excellent critical thinking as well as analytical skills
- Ability to be self-directed while working under tight deadlines
- Close attention to detail
- Strong computer skills and knowledge of relevant software
- Possesses exceptional organizational skills
- Ability to communicate effectively with a wide variety of people
- Ability to travel as required
- Must be capable of working independently and as part of a team.

- Manage multiple concurrent assignments while meeting deadlines

**Preferred Skills:**

- Metal-plated floor and roof truss design software, TJ Beam/Forte, KeyBeam, or other EWP manufacturers' software is a plus.
- Experience with Mass Timber BIM, CADworks, and MiTek Sapphire Software helpful.
- Construction/framing experience is a plus.

**Benefits:**

- Medical + Dental + Vision
- Flexible Spending Accounts
- Discretionary Bonus
- 401(k) Retirement Savings with Company Stock Option
- Paid Time Off
- Salary for this position is DOE
